# **REVIEW OF THE MINNESOTA PROPERTY TAX SYSTEM TAXES PAYABLE IN 2001**

---

Property tax is the major source of revenue for local governmental units in the state of Minnesota. The state has not levied a property tax since 1966. The property tax is an ad valorem tax (a tax in proportion to value). It is levied in one year based on the property assessment as of January 2 and becomes payable in the following calendar year. For example, in this bulletin, the current year tables include taxes levied based on assessments made on January 2, 2000, due and payable in 2001. The property tax on a particular parcel of property is primarily based on its market value, property class, the total value of all property within the taxing area, and the budget requirements of all local governmental units located within the taxing area.

The following is a general description of and background information on the property tax system in Minnesota and the laws that were applicable to taxes payable in 2001.

## **Determination of Values**

### **Assessors**

---

The county assessor is appointed to a four-year term by the County Board of Commissioners and is approved by the State Commissioner of Revenue. The county assessor has various duties prescribed by law, among which are the following: keeps local assessors advised of changes in assessment laws, instructs local assessors in property classification and determination of values, and is ultimately responsible for final assessments based on the values reported by local or deputy assessors.

### **Exempt Property**

---

Certain property types are exempt from ad valorem taxation. Property that qualifies for exemption is listed in the Constitution of the State of Minnesota and is reassessed once every six years, with the most recent assessment being made in 1998. Information about exempt property was included in the 1999 Property Tax Bulletin.

Constitutionally exempt real property includes:

- 1) public burying grounds,
- 2) public and private schools,
- 3) public and private hospitals,
- 4) academies, colleges, universities, and seminaries of learning,
- 5) churches, church property, and houses of worship,
- 6) institutions of purely public charity,
- 7) forest and parks,
- 8) Native American lands, and
- 9) public property used exclusively for any public purpose.

Exempt personal property and other properties which have been given a statutory exemption, but are not constitutionally exempt, are not reported.

## **Contamination Tax (M.S. 270.91)**

The contamination tax was enacted by the 1993 Legislature and was effective beginning with taxes payable in 1995. It applies to the “contamination value” of real property. “Contamination value” is the amount of market value reduction granted for property tax purposes due to the presence of contaminants as defined by Minnesota Statutes (M.S.) 115B.25, subdivision 7a. The contamination may involve structures, soil, ground water and air. It may include commercial chemicals, petroleum products, asbestos, radon gas, pesticides, fertilizers and other harmful substances. Contamination value is not part of the tax base for the purpose of general property taxes. The reduction in market value constituting “contamination value” may be granted:

- 1) by a court,
- 2) by a board of review,
- 3) by the assessor upon petition by the property owner, or
- 4) by the assessor.

The contamination value cannot be greater than the estimated cost of implementing a reasonable response action plan or asbestos abatement plan for the property. If the market value reduction for the parcel is less than \$10,000, the contamination value is zero.

Contamination net tax capacity is used in calculation of the contamination tax. Contamination tax is not a property tax, but a property related tax affecting various classifications of real property, including commercial, industrial, apartments, agricultural and residential. The contamination net tax capacity for a parcel is equal to the difference between 1) net tax capacity based on applying current year class rate to the “market value total” (taxable market value plus market value loss from contamination if \$10,000 or more) and 2) net tax capacity based on applying current year class rate to the taxable market value. The contamination tax is equal to the contamination tax rate multiplied by the contamination net tax capacity of the property. The “contamination tax rate” for the property depends upon documentation supplied by the owner of the property.

<b>Cleanup Status</b>	<b>CONTAMINATION TAX RATE</b>	
	<b>Responsible Party</b>	<b>Non-Responsible Party</b>
No cleanup or cleanup plan	100%	25%
Plan has been approved, or contaminants are asbestos and owner has an abatement plan in place	50%	12.5%
Cleanup done	No tax	No tax

Contamination tax is listed in Table 52 on page 284.

## **Taxable Property**

---

Assessors determine the estimated market value of all taxable property within their jurisdiction as of January 2 of each year, except state-assessed properties such as public utilities, railroads, air-flight property and minerals. All properties within a taxing district are reassessed once every four years. One-fourth of the parcels within a taxing district are assessed each year so that all parcels can be reassessed at least once in a four-year period. Property that is exempt from taxation is assessed once every six years - see Exempt Property above. The legislature has provided various programs that may reduce the estimated market value for certain types of property for purposes of taxation. These reductions are made by deferment, limitation or exclusion and are explained below. The market value after these reductions is referred to as the taxable market value.

The assessor also assigns a classification(s) to each parcel of property according to how the property is used, i.e., commercial, agricultural homestead, etc. Each classification has a net classification percentage rate, which is applied to the taxable market value to determine the net tax capacity value. The net tax capacity value is used in determining initial tax capacity rates for taxes payable in 2001.

### **Historical Notes:**

For taxes payable in 1989, the market value was multiplied by a classification percentage to arrive at "gross tax capacity value." The gross tax capacity was used to compute "tax capacity rates."

Prior to the 1988 assessment, the market value was multiplied by a classification percentage to obtain the "assessed value". This assessed value was used in determining "mill rates".

Prior to the 1972 assessment, the market value was divided by three to arrive at an "adjusted market value." The various classification rates were then applied to the adjusted market value to determine the assessed value. Thus, assessed values for taxes payable in 1972 were approximately one-third of what they were for taxes payable in 1973. Since mill rates were in part based on assessed value, mill rates for payable 1972 were approximately three times what they were for payable 1973. (See Table 1, page 31.)

## **Review and Equalization**

---

The assessor estimates the market value of the property to be taxed and assigns it to a class according to its use. This assessment is subject to review and equalization at three levels: the local (city or township) Board of Review, the County Board of Equalization, and the State Board of Equalization. It is the duty of these boards to listen to appeals and to equalize property assessments and values within classes of property and within and between the various taxing districts.

## **Changes to Estimated Market Value**

Certain deferments and limitations may be applied to estimated market value. Generally, they take precedence in the order listed here.

### **Platted Property (M.S. 273.11, subdivision 14)**

When undeveloped land is platted, the assessor must apportion the existing market value of the land that was platted to the individual lots in the plat. Because platting increases a property's marketability, the result is often an increase in the estimated market value. Minnesota Statutes 273.11, subdivision 14, limits how rapidly this market value increase can be applied by the assessor. Any difference between the pre-plat value and the value after platting must be applied to the property in equal increments over a three-year period. If construction begins on any lot before the third year, the lot is valued at its full estimated market value for the next assessment.

### **Minnesota Agricultural Property Tax Law - Green Acres (M.S. 273.111)**

The Minnesota Agricultural Property Tax Law, commonly known as the Green Acres Law, provides that certain property owners, engaged in agricultural pursuit, can apply for deferment of higher valuations (based on potential use) and consequent taxes payable, including special assessments. For current year taxes the property is valued and taxed based upon its valuation for farm purposes. Green acres effect on farmland value in 2001 is reported in Table 30, page 120.

### **Minnesota Recreational Deferment (M.S. 273.112)**

The Minnesota Recreational Property Tax Law (also known as the "Open Space Property Tax Law") provides for deferment of higher valuations and consequent taxes payable on private outdoor recreational, open space and park lands whose valuations have been increased by assessors to reflect the potential residential or commercial land values of the property. The property must be actively and exclusively devoted to recreational activities such as golf, skiing, lawn bowling, croquet, archery or firearms range recreational use. The deferred taxes constitute a lien on the property, and are paid when the property no longer qualifies for the deferment. The real estate involved must meet certain criteria and application must be made for deferment of taxes and assessment each year.

### **Limited Market Value (M.S. 273.11, subdivision 1a)**

The 1993 Legislature reinstated the limited market value concept. The assessor compares the current estimated market value with the market value (after limitation) determined in the preceding assessment year for all property classified as agricultural homestead and non-homestead, residential homestead and non-homestead, or non-commercial seasonal

recreational residential. The amount of the increase, which is entered by the assessor in the current assessment year, must not exceed the greater of: (1) 8.5% of the preceding year's market value after limitation or (2) 15% of the difference between the current estimated market value and the preceding market value after limitation. This limitation, which does not apply to increases in value due to improvements, is effective only through assessment year 2001.

*Historical Note:* The 1973 Legislature originally created the concept of limited market value. Although the formula for calculating that limitation changed frequently, it was in effect through assessment year 1979.

### **Valuation Exclusion for Certain Improvements - "This Old House" and "This Old Business (M.S. 273.11, subdivisions 16 and 19)**

"This Old House" allows an adjustment to the assessor's estimated market value and was enacted in 1993 for improvements made through January 2, 2003. This law is designed to provide owners of older and deteriorated homes with an incentive to restore them and hopefully will preserve and revitalize older neighborhoods. The property must be at least 45 years old when improvements commence, be eligible for homestead treatment, and meet estimated market value limitations. Only certain types of improvements qualify and application must be made at specified times during the project to qualify. The exclusion of the value of the improvement is effective for ten years, after which 20% of the total exclusion is added to the property for each of the following five years if the value added is greater than \$10,000. If the value added is less than \$10,000, then 50% of the total exclusion is added for each of the following two years. This exclusion first affected taxes payable in 1995. Relocated residences may also qualify.

Commercial or industrial property in non-metropolitan cities of 10,000 or less in population that are eligible for the preferred class rate may qualify for an exclusion from market value for tax purposes under the "This Old Business" valuation exclusion. The improvements must have been made from July 1, 1997 through Jan 1, 1999.

The assessor applies these deferments and limitations to the estimated market value to arrive at taxable market value. The taxable market value is multiplied by the assigned net class rate to arrive at net tax capacity.

## Property Classifications

---

After market values are determined, properties are given classifications according to use. This property classification system was developed by the 1913 Legislature. Beginning in 1914, the following four classes of property were used to determine assessed values:

- Class 1** Iron Ore (mined or unmined), assessed at 50% of full and true value.
- Class 2** Household goods and personal effects, assessed at 25%.
- Class 3** Unplatted real estate, livestock, farm produce, inventories and manufacturers' tools, assessed at 33 1/3 %.
- Class 4** All other properties, primarily urban real estate, assessed at 40%.

In 1933, the Legislature made a significant change in the classification system by giving a preferential percentage rate to homestead property. The following two classifications went into effect in assessment year 1934:

- Class 3b** Unplatted real estate used for a homestead, assessed at 20% on the first \$4,000 of full and true value, and 33 1/3 % on value over \$4,000.
- Class 3c** Platted real estate used for a homestead, assessed at 25% on the first \$4,000 of full and true value, and 40% on value over \$4,000.

Property classification changes have been made during every legislative session since 1941. The next major reform to the property tax system came in 1967 with the passage of the "Tax Reform and Relief Act." The tax relief programs created by this act were designed to reduce the burden of local property taxes by reducing the costs of local government and providing taxpayers with reimbursements linked to property tax payments. The state, in effect, took increased fiscal responsibility for local costs. Under this act all farm livestock and machinery were exempt from property taxation. Businesses were given the option to exempt either inventory or tools and machinery. Other property tax relief programs not relating to the property classification system were also enacted, including homestead credit, renters' credit, senior citizen income tax credit, local government aids and elimination of the state property tax levy.

The property classification system has evolved into many property classes and classification percentages. In 1988, the number of property tax classes was cut from 68 to 29. Included in this bulletin is a listing of classification percentages from taxes payable 1989 through 2001. (See Table 12, page 52.) The following is a listing of the classification percentages used for the 2000 assessment, taxes payable in 2001.

# REAL PROPERTY

<u>Class</u>	<u>Year Enacted</u>	<u>Description</u>	<u>Percent of Market Value</u>
1a	1933	Residential homestead:*	
		First \$76,000 market value	1.00%
		Market value in excess of \$76,000	1.65%
1b	1953, 1969 & 1974	Paraplegic veterans, homesteads of blind and permanently and totally disabled persons: Agricultural: House, Garage and one acre: First \$32,000 market value \$32,000 to \$76,000 market value Market value in excess of \$76,000 Remainder of Farm: First \$115,000 market value \$115,000 to \$600,000 market value Market value in excess of \$600,000 Residential: First \$32,000 market value \$32,000 to \$76,000 market value Market value in excess of \$76,000	0.45% 1.00% 1.65%  0.35% 0.80% 1.20%  0.45% 1.00% 1.65%
1c	1959 & 1989	Commercial seasonal recreational residential not used for more than 250 days per year, which includes a portion used as a homestead by the owner	1.00%
1d	1997	Structures occupied exclusively by seasonal farm workers: First \$76,000 market value Market Value in excess of \$76,000	1.00% 1.65%
2a	1933	Agricultural homestead: House, garage and one acre: First \$76,000 market value Market Value in excess of \$76,000 Remainder of Farm: First \$115,000 market value \$115,000 to \$600,000 market value Market value in excess of \$600,000	1.00% 1.65%  0.35% 0.80% 1.20%
2b	1957	Timberland	1.20%
2b	1923	Agricultural non-homestead, land	1.20%

\* Townhouse property is classified and valued as all other homestead real estate. Value is added for each unit's share of the development's common areas.

<b>REAL PROPERTY</b>			
<u>Class</u>	<u>Year Enacted</u>	<u>Description</u>	<u>Percent of Market Value</u>
3a		Commercial, industrial, public utility land and buildings, railroad operating property:	
	1981	First \$150,000 market value	2.40%
		Market value in excess of \$150,000	3.40%
	1974	Located in a transit zone:	
		First \$150,000 market value	2.40%
		Market value in excess of \$150,000	2.975%
3a	1974	Tools, implements and machinery of an electric generating, transmission or distribution system or a pipeline system transporting or distributing water, gas or petroleum products which are fixtures to real property. (Public Utility Machinery)	3.40%
3b	1982	Employment Property (Enterprise Zones):	
		Competitive City or Zone:	
		First \$150,000	2.40%
		Market value in excess of \$150,000	3.40%
		Border City:	
		First \$150,000	2.40%
		Market value in excess of \$150,000	3.40%
4a	1971	Residential non-homestead, including land:	
		a. Apartments with four or more units (non-government)	
		1. Those not in certain small cities:	2.40%
		2. Those in certain small cities:	2.15%
		b. Private for Profit Hospitals	2.40%
4b		Unclassified manufactured homes	1.65%
4b	1997	Residential non-homestead, 3 units or less including land:	1.65%
4bb		Residential non-homestead, single units:	
		First \$76,000 market value	1.20%
		Market value in excess of \$76,000	1.65%
4c		Post Secondary Student Housing	1.20%
4c	1959	Seasonal residential for recreational purposes:	
		a. Commercial, but not used for more than 250 days per year (example: resort)	1.65%

## REAL PROPERTY

<u>Class</u>	<u>Year Enacted</u>	<u>Description</u>	<u>Percent of Market Value</u>
		b. Non-commercial (example: cabin):	
		First \$76,000 of market value	1.20%
		Market value in excess of \$76,000	1.65%
4c	1997	Qualifying golf courses	1.65%
4c		Non-profit community service oriented organizations	1.65%
4c	1989	Manufactured Home Parks	1.65%
4c	1999	Metro Non-profit Recreational Property	1.65%
4c	2000	Certain aircraft hangars	1.65%
4d	1998	Qualifying low-income housing, land and buildings – includes single unit and qualifying portions of multi-unit buildings.	1.00%
5	1913	Unmined Iron Ore	3.40%
5	1913	"Low Recovery" Iron Ore	3.40%
		Separate mineral interests tax	**
5		All property not included in any other class	3.40%

\*\* 40 cents per acre annually and each parcel is subject to minimum annual tax of \$3.20. The tax became effective January 1, 1975.

## PERSONAL PROPERTY

<u>Class</u>	<u>Year Enacted</u>	<u>Description</u>	<u>Percent of Market Value</u>
None		Structures on leased public lands in rural areas	1.20% or 1.65% 2.40% or 3.40% 2.15% or 2.40%
		1 to 3 units	1.65%
3a		Tools, implements, and machinery of an electric generating, transmission or distribution system or a pipeline system transporting or distributing water, gas, or petroleum products that are fixtures.	3.40%

## PERSONAL PROPERTY

<u>Class</u>	<u>Year Enacted</u>	<u>Description</u>	<u>Percent of Market Value</u>
None		Leased agricultural real estate of exempt land (M.S. 272.01, subdivision 2)	0.35%, 0.80% or 1.20%
None	1969	Owner occupied residences on leased public or railroad lands	*
None	1981	Leased homestead on land owned by occupant	*
3a**		Structures on leased public lands in urban areas	2.40% & 3.40%
		Structures on railroad operating right-of-ways	2.40% & 3.40%
		Leased all other (non-agricultural) real estate of exempt land (M.S. 272.01, subdivision 2)	2.40% & 3.40%
		Systems of electric, gas and water utilities	2.40% & 3.40%
		All other taxable personal property	2.40% & 3.40%

\* Buildings received classification rate as if they were homesteaded real property within the scope of Class 1a, 1b, or 2a whichever is applicable.

\*\* Assessed at 2.40% on first \$150,000 of market value and assessed at 3.40% on excess.

## CLASSIFICATIONS NO LONGER ASSESSED

There is **no** assessment on the following former classes of property:

<u>Class</u>	<u>Description</u>
3	Personal - Inventories, stocks of merchandise of sorts, all materials, parts and supplies, furniture and equipment, manufacturer's materials, manufactured articles including the inventories of manufacturers, wholesalers, retailers and contractors, and the furnishings of a room or apartment in a hotel, rooming house, tourist court, motel or trailer camp, and tools and machinery, which by law are considered as personal property.
3a	Agricultural products in the hands of the producer.
3j	Petroleum refinery's personal property.
3	Real - Machinery which constitutes fixtures to real estate except public utilities under ad valorem taxation.

## **Determination of Initial Tax Rates, Local Tax Rates, Tax Before Credits, and Net Tax**

### **Auditors**

---

Each county elects a county auditor who keeps a record of all taxable property in the county and delivers a list of property owners and their respective taxes to the county treasurer. The auditor is also responsible for determining tax rates based on the property tax budgets of local governmental units.

Local units of government determine the amount of money they will need to fund their various services (such as fire protection, street maintenance, and education) for the coming year. Budgets are prepared based on service costs and non-property tax revenue. Non-property tax revenue includes state and federal aids, parking meters, fines, licenses, permits, municipal liquor stores, and local sales taxes. Next, the portion of the budget that will need to be financed by property taxes is determined. In general terms, the property tax levy equals the difference between service costs and non-property tax revenue.

All local taxing district property tax levies are certified to the county auditor. Each taxing district must deduct its homestead and agricultural credit aid (HACA) from its property tax levy before certifying the levy to the county auditor. The auditor calculates initial tax rates by dividing the certified levy, less fiscal disparity distribution tax (metropolitan and taconite counties only), by the taxable net tax capacity value. Net tax capacity values are reduced by tax increment value, certain power line values and fiscal disparities contribution values to obtain a taxable net tax capacity value used in calculating tax rates. (See "Adjustments to Net Tax Capacity Value" on the following page.)

### **Levy Limitations**

---

Although the 1992 Legislature repealed the major statewide levy limitations, the levy limitations are still in effect for special purposes that have general application to one or more types of local units of government. Beginning with taxes payable year 1990, these limitations are primarily expressed as percentages of market value.

Certain major levy limitations are administered by the state departments rather than by the county auditor. The Department of Children, Families and Learning administers school district levy limitations. The Department of Revenue administers the levy limitations that apply specifically to the Metropolitan Council, the Metropolitan Transit Board and the Metropolitan Mosquito Control District.

## **Adjustments to Net Tax Capacity Value**

---

Taxable net tax capacity value is used in determining initial tax rates. In many cases, taxable net tax capacity value is the same as net tax capacity value. However, there are cases where certain values must be deducted from the total net tax capacity value to determine the taxable net tax capacity value. This is illustrated in Table 32, page 187. Values that are deducted are as follows.

### **Power Line Net Tax Capacity Value**

---

Ten percent of the net tax capacity of electrical transmission lines over 200KV in organized townships and cities is excluded from the value used in determining initial tax rates. After local tax rates are determined, the revenue produced by applying the prevailing local tax rate to the excluded 10% of value is then used to finance the power line credit for cities and organized townships. (See Power Line Credit, Table 45, page 269.)

### **Fiscal Disparities**

---

The Metropolitan Development Act, more commonly known as "Fiscal Disparities", was first implemented for taxes payable in 1975. It established a new property tax system for the seven metropolitan counties of Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington. Although the law is complex, it can be briefly summarized as follows.

Forty percent of the increase in commercial-industrial (including public utility and railroad) net tax capacity valuation in each taxing district since 1971 is contributed to an area-wide tax base. Using the factors of population and real property market value per capita, a distribution index is calculated. This index is employed in determining what proportion of the tax capacity value in the area-wide tax base shall be distributed back to each taxing district. This amount is referred to as the distribution tax capacity value.

A taxing district's budget levy, less HACA, is also reduced by the levy amount it is permitted to spread on the area-wide tax base. Its area-wide levy amount is its distribution net tax capacity value multiplied by its prior year initial tax rate. The reduced budget levy divided by the taxing district's taxable net tax capacity value (net tax capacity value less contribution, tax increment, and certain power line net tax capacity values) equals its current year initial tax rate. The initial tax rate times the taxable net tax capacity value is equal to the local portion of each district's property tax budget levy; whereas, the prior year initial tax rate times the distribution value is equal to the area-wide portion. Metropolitan county auditors certify to the administrative auditor the area-wide portions of the levy for each district located within their county. The administrative auditor then computes an area-wide tax rate by dividing the total of the area-wide levies by the total area-wide tax base (total contribution net tax capacity).

A calculated proportion of the tax capacity value of each commercial-industrial parcel of property is taxed based on the area-wide tax rate; the remaining value is taxed based on the local tax rate.

As a result of the aforementioned law, the property tax levy of a taxing district is not the tax amount paid by the taxpayers located within the geographic boundaries of that district. The amount they paid could be more or less than what is actually needed by the district in which they live, depending upon whether the area-wide tax rate was larger or smaller than the local tax rate and whether the contribution value was larger or smaller than the distribution value.

The 1996 Legislature established a similar program for taconite relief area tax base sharing, known as the "Iron Range Fiscal Disparities" program. The base year for this program is 1995. Counties affected are Aitkin, Cook, Crow Wing, Itasca, Koochiching, Lake and St. Louis.

### **Tax Increment Financing Districts**

---

Tax increment financing (TIF) provides a means of financing renewal and renovation projects. Prior to the TIF Act of 1979, there were seven basic types of TIF districts that were authorized by general or special laws:

- 1) Housing and Redevelopment Authority (M.S. Chapter 462 - Laws 1957, Chapter 810);
- 2) Port Authority (M.S. Chapter 458 - Laws 1957, Chapter 812);
- 3) Municipal Industrial Development (M.S. Chapter 473 - Laws 1967, Chapter 297);
- 4) Minnesota Rural Development Finance Authority (M.S. Chapter 362A - Laws 1971, Chapter 920);
- 5) Municipal Development District (M.S. Chapter 474 - Laws 1974, Chapter 485);
- 6) Metropolitan Housing and Redevelopment Authority (M.S. Chapter 473 - Laws 1975, Chapter 13);
- 7) St. Paul Urban Renewal (Laws 1963, Chapter 891);  
Hopkins Development Districts (Laws 1971, Chapter 548);  
Minneapolis and Robbinsdale Development Districts (Laws 1971, Chapter 677);  
Red Wing Development Districts (Laws 1971, Chapter 196);  
Duluth Development Districts (Laws 1973, Chapter 761);  
St. Paul Development Districts (Laws 1973, Chapter 764)

For payable 2001, five types of increment districts exist:

- 1) Redevelopment Districts
- 2) Housing Districts
- 3) Economic Development Districts
- 4) Soil Condition Districts
- 5) Renewal and Renovation

In addition, the law provides for the creation of hazardous substance subdistricts or sites.

Although these types of districts have particular distinguishing characteristics, all commonly possess the authority to retain the tax dollars generated by the "retained captured net tax capacity". The retained captured value is based on all parcels within the TIF district. The retained captured value equals the captured value less any fiscal disparity or shared value reductions and after any prior year net tax capacity adjustments. The captured value equals the difference between the current year net tax capacity value and the original net tax capacity value of the properties within the TIF district.

The retained captured value, along with power line and fiscal disparity value, is deducted from the total net tax capacity value to obtain taxable net tax capacity. The taxable net tax capacity is then used in the calculation of initial tax rates.

For TIF districts certified on or before May 1, 1988, the tax generated by the product of the current total local tax rate and the retained captured value is retained by the TIF district and used to finance the project debt. If a TIF district was certified after May 1, 1988, the tax retained by the TIF district is equal to the product of the original local tax rate times the retained captured value. The original local tax rate is the total local tax rate for the original year of the TIF district. If the current local tax rate is greater than the original tax rate, the difference between them times the retained captured value is excess TIF tax and is distributed to the local units of government. (See Table 22 on page 70.)

For example, a pre-May 1, 1988 TIF district has the following characteristics: \$5,000 of original net tax capacity; \$12,000 of current net tax capacity; \$1,000 of shared fiscal disparity net tax capacity; and no shared net tax capacity. The captured net tax capacity value equals \$7,000 (\$12,000 - \$5,000). The retained value equals \$6,000 (\$7,000 - \$1,000). Assume the local tax rate is 120%, then the amount of tax dollars retained by the TIF district is \$7,200 (\$6,000 multiplied by 120%).

Tax increment values and taxes can be found in Table 27, page 88.

## Adjustments to Property Tax Budget Levy

### Fiscal Disparity Distribution Levy

The fiscal disparity distribution levy is the levy amount that a metro or iron range county taxing district receives from the area-wide pool. This amount is deducted from the property tax budget levy as explained in the previous section on fiscal disparities.

### Homestead and Agricultural Credit Aid (M.S. 273.1398, subdivision 2)

Homestead and agricultural credit aid (HACA) was enacted during the 1989 Special Session, effective in payable year 1990. HACA is calculated at taxing district level by the Department of Revenue and certified to taxing districts each year.

HACA replaced both the homestead credit and agricultural credit programs. A major difference from those credits is that HACA is excluded from the property tax levy before the levy is certified and prior to the calculation of any tax rates. Credits were deducted after tax rates and taxes had been determined.

According to Minnesota Statute, the basic formula for calculating the payable 2001 HACA is:

$\begin{aligned} &\text{Payable 2000 Certified HACA} \times \text{the Growth Adjustment Factor} \\ &\text{PLUS} \\ &\text{a Net Tax Capacity Adjustment Factor and a Fiscal Disparity Adjustment Factor} \end{aligned}$
---

The law provides specific definitions for each variable in the formula. It also provides for various adjustments, offsets and transfers to be made.

A separate calculation of Manufactured Home HACA is made for manufactured home properties assessed as personal property (M.S. 273.166, subdivisions 1 to 4).

### Initial Tax Rate Determination

When the property tax levy portions of all taxing districts' budgets have been set and certified to the county auditor, and when taxable net tax capacity values have been determined, then initial tax rates for each governmental unit (i.e., county, city, town, school and special taxing districts) are determined. Basically, the initial tax rate is calculated by dividing the certified property tax levy, less fiscal disparity distribution levy (metropolitan and iron range counties only), by the taxable net tax capacity value. For example, if a city's levy less the fiscal disparity distribution levy (for metropolitan and iron range cities only) was \$100,000 and the taxable net tax capacity value was \$350,000, the total city initial tax rate would be calculated as follows:

$\$100,000 / \$350,000 = .28571 \text{ or } 28.571\%$
---

In a unique taxing area (a geographic area subject to the same set of tax rates), the total initial tax rate is equal to the total of the initial tax rates for all taxing districts levying in that area. This rate is applied to each taxable parcel of property in the unique taxing area to determine the amount of net tax capacity based property tax which is owed, unless the unique taxing area receives disparity reduction aid.

## **Initial Tax Rate Exceptions**

---

Under normal circumstances, initial tax rates are calculated by using the formula above. However, there are instances where initial tax rate calculations deviate from the norm, as follows.

### **Fire Protection Districts**

---

Township tax rates are influenced by the presence of special fire protection districts (M.S. 368.85). Any organized town may, through a majority vote cast by the electors within the proposed district, establish a territory which will receive fire protection. A fire district consists of compact and contiguous property of which at least 25% of the total tax capacity value of taxable real property therein is classified as homestead property and other buildings or structures. All fire protection district costs are paid from tax dollars generated by the property located within its boundaries. The fire district cost is reflected in a higher municipal tax rate for the concerned property. Property outside of the district does not contribute tax dollars toward this protection.

### **Rural-Urban Service Districts**

---

Active rural-urban service districts will cause city tax rates to vary within the city. A rural service district and an urban service district, which are adopted by ordinance, constitute "separate taxing districts for the purpose of all municipal property taxes except those levied for the payment of bonds and judgments and interest thereon." (M.S. 272.67) Only unplatted lands which are rural in character and which are not developed for commercial, industrial or urban use can become rural service districts. Such land is not benefited to the same degree as other lands by municipal services financed by general taxation. An urban service district consists of all lands within the boundaries of the municipality which are not included in the rural service district. Lesser benefits within a rural service district result in lower tax rates for taxpayers within its boundaries than for taxpayers located within the boundaries of the complementary urban service district.

### **Subordinate Service Districts**

---

Subordinate service districts were established by the 1982 Legislature for counties (M.S. Chapter 375B) and by the 1989 Legislature for towns (M.S. Chapter 365A) to provide a means by which the county or town can effectively provide and finance various governmental services for its residents. The districts are portions of a county or town that receive one or more services that are not provided in the

remainder of the county or town, or which receive an increased level of a service already provided to the entire county or to the entire town. The additional or increased level of service may be financed by a property tax levy imposed on the users of the service within the subordinate service district, by a service charge imposed on the users of the service within the subordinate service district, or by a combination of property tax and service charge within the subordinate service district.

Subordinate service districts may account for the differential tax rates found in certain counties or towns. The counties within the seven county metropolitan area, as well as St. Louis County, are not authorized to establish subordinate service districts. Cities are also not authorized to establish subordinate service districts, but may establish special service districts, which are somewhat different.

## **Local Tax Rate Determination, Disparity Reduction Aid**

---

Disparity Reduction Aid (DRA) was created by the 1988 Legislature (M.S. 273.1398, subdivision 3) to provide relief for high tax rate areas. It was first payable to taxing jurisdictions in 1989.

If a unique taxing area receives DRA, the initial tax rate for each taxing district levying within the unique taxing area (except cities and special taxing districts) must be reduced accordingly. The resulting rate is the local tax rate. DRA cannot reduce the total local tax rate below 90%. If the unique taxing area does not receive DRA, the local tax rate is equal to the initial tax rate.

Disparity Reduction Aid is calculated by the Department of Revenue and certified at unique taxing area level to the county auditors each year. Payable 2001 certified DRA amounts were calculated by applying an adjustment factor (for the class rate changes from payable 2000 to 2001) to the payable 2000 certified DRA amounts.

Disparity Reduction Aid amounts for special taxing districts were added into the county DRA amount for that area effective for taxes payable in 1995 according to legislation passed by the 1994 Legislature. The DRA program for cities was eliminated by the 1993 Legislature as the amounts were folded into local government aid.

## **Referendum Market Value Based Levies**

---

*Historical note:* The market value based referendum tax provision was enacted by the 1991 Legislature and became effective in payable year 1993. Certain referendum levies (voter approved taxes), were based upon taxable market value rather than net tax capacity for the years 1993 through 1996. Effective for taxes payable in 1995, operating school district referendum levies that had been based on taxable market value were based on "school district referendum market value". School district referendum market value is a

modified market value where property with a class rate of less than one percent has a school district referendum market value equal to its class rate times 100 times its market value. All other properties have a school district referendum market value equal to their taxable market value. For taxes payable in 1995 and 1996, school district referendum market values for class 1b (blind/paraplegic/disabled veteran) homesteads and for agricultural homestead outbuildings and land less than \$115,000 was equal to 45% of their taxable market value. All other property types had a school district referendum market value equal to their entire taxable market value.

Beginning with taxes payable in 1997, all non-school local governments are required to use the same definition of referendum market value that was used by school districts for referendum levies, and no levies are based on taxable market value. The term "school district referendum market value" is replaced by "referendum market value".

### **Referendum Market Value Based Levies (M.S. 275.08, subdivision 1b; M.S. 275.61)**

Referendum levies for counties, cities, townships and special taxing districts must meet all the criteria in a column in the following table in order to be based on referendum market value. If the criteria are not met, the referendum levy continues to be based on net tax capacity.

<b>VOTER APPROVED LEVIES SUBJECT TO REFERENDUM MARKET VALUE BASE</b>				
<b>TYPE OF GOVERNMENT</b>	<b>COUNTY</b>	<b>CITY</b>	<b>TOWN</b>	<b>SPECIAL TAXING DISTRICT</b>
<b>Purpose</b>	General or Special (including Bonds)	General or Special (including Bonds)	General or Special (including Bonds)	General or Special (including Bonds)
<b>Year Effective</b>	Pay 1993 and/or after	Pay 1993 and/or after	Pay 1993 and/or after	Pay 1993 and/or after
<b>Date of Referendum</b>	Held on or after 5/1/92; or Held after 5/31/91 and before 5/1/92 and publicly advertised using levy amounts reflecting market value	Held on or after 5/1/92; or Held after 5/31/91 and before 5/1/92 and publicly advertised using levy amounts reflecting market value	Held after 5/31/91	Held after 5/31/91

### **Referendum Market Value Based Levies for School Districts (M.S. 126C.17, subdivision 10)**

The following school district referendums were based on school district referendum market value beginning in payable 1995:

- 1) market value based operating referendums approved in prior years;
- 2) net tax capacity based operating referendums converted by school districts to market value based status (these conversions are to take place from payable 1995 through payable 1997); and
- 3) newly approved market value based operating referendums.

It should be noted that only operating school district referendums are based on referendum market value. All non-operating (debt) school district referendums continue to be based on net tax capacity.

Referendum levies based on referendum market value are identified separately from net tax capacity based levies when they are certified to the county auditor. Unlike net tax capacity based levies, referendum market value based levies are not subject to reductions by DRA. Beginning with 1998, the county auditor has the option to deduct school district distribution levies from the market value based referendum levies as well as from the net tax capacity based levies. The county auditor calculates a referendum market value based tax rate for each governmental unit with a referendum market value levy, by dividing the referendum market value levy by the total referendum market value for that taxing district. The referendum tax rate is expressed as a percentage, similar to the net tax capacity based tax rate. Net tax capacity based tax rates are shown with three decimal places, whereas referendum market value based tax rates are shown with five decimal places due to the large dollar value of the referendum market value tax base.

The market value based referendum tax provisions do not affect tax increment financing, power line tax, rural/urban service districts, HACA calculation or DRA calculation procedures.

Property tax credits may or may not be affected by the referendum market value based tax. The upcoming section on credits addresses how each individual credit is affected by the referendum market value based tax.

## **Total Tax Before Credits**

---

After all market value based tax rates and net tax capacity based local tax rates have been determined, the total tax before credits for each parcel of property is calculated. This amount is the sum of: 1) the total local tax rate times the individual property's net tax capacity, and 2) the referendum market value based tax rate times the individual property's referendum market value. For example, a property with a referendum market value of \$124,800, a net tax capacity value of \$1,776, a total referendum market value based tax rate of .08964%, and a total local tax rate of 119.399% would have the following tax:

Referendum Market Value	\$124,800
Total Referendum Market Value Based Tax Rate	<u>x .08964%</u> (or .0008964)
Total Referendum Market Value Based Tax	\$ 111.87
Net Tax Capacity	\$1,776
Total Local Tax Rate	<u>x 119.399%</u> (or 1.19399)
Total Net Tax Capacity Based Tax	\$2,120.53
Total Referendum Market Value Based Tax	\$ 111.87
Total Net Tax Capacity Based Tax	+ <u>\$2,120.53</u>
Total Tax Before Credits	\$2,232.40

## Property Tax Credits

---

Due to the existence of property tax credits, in some instances, the total tax before credits will not be the final amount of property tax paid by an individual taxpayer. The property tax credits in existence for taxes payable in 2001 are as follows, listed in the order that they are deducted from the tax before credits.

### Disaster Credit (M.S. 273.123)

---

The disaster credit was set up by the 1982 Legislature to provide tax relief for homeowners whose homes have been damaged by a disaster. This credit became effective for taxes payable in 1984.

The credit is based on a reassessment of the value of homestead property that is located within a declared disaster or emergency area. The county assessor determines the referendum market value and net tax capacity of the damaged home and these values are subtracted from the referendum market value and net tax capacity of the home before the disaster occurred. The difference is then multiplied by the fraction created by dividing the number of full months remaining in the year (after the disaster happened) by 12. This product is then subtracted from the pre-disaster referendum market value and net tax capacity to get the average market value and average net tax capacity for the year.

The county assessor reports the referendum market value and net tax capacity value based on the pre-disaster value and the referendum market value and net tax capacity value based on the post-disaster average value to the county auditor. The difference between the two tax capacity values is then multiplied by the prevailing local tax rate. The difference between the two referendum market values is multiplied by the total referendum tax rate. The sum of these two products is the disaster credit amount. There is no maximum credit limitation for the disaster credit. The amount of the credit is deducted from the tax before credits on the property tax

statement for that parcel. The tax before credits is the sum of the referendum market value based tax and the net tax capacity based tax. The state pays the amount of disaster credit deducted from the taxpayer's tax directly to the local taxing districts. One county claimed disaster credit in 2001 (see Table 48, page 272). Eligible manufactured home properties can also receive the disaster credit.

### **Power Line Credit (M.S. 273.42)**

---

The power line credit was established by the 1980 Legislature as a means of reducing the property tax burden of those taxpayers whose properties have high-voltage electrical lines passing over them. This credit first became effective for taxes payable in 1982.

Prior to 1982, utility companies made direct payments to qualifying property owners in organized and unorganized townships to compensate them for having these high voltage lines pass over their property. Beginning with taxes payable in 1982, qualifying property owners in cities and organized townships were given a property tax credit to reduce their property tax. In 1983, qualifying property owners in unorganized townships were also made eligible to receive the tax credit. Since that time and for taxes payable in 2001, owners of property classified as farm, residential, apartment, etc., are given a credit which is calculated by the county auditor and applied against the tax before credits. In order to qualify for this credit, the property must be crossed by a transmission line of 200KV or more that was constructed after June 30, 1974.

For qualifying property owners in unorganized townships having these high voltage lines pass over their property, the credit is calculated as follows. A fraction, determined by dividing the length of high voltage line over the parcel by the total length of high voltage line running over all property within unorganized townships in the county, is multiplied by the total amount of the utility property tax credit fund (tax generated on unorganized townships) within the county for that year. The calculated amount is then deducted from the tax before credits. The tax before credits is the sum of both the market value based tax and the net tax capacity based tax.

For qualifying property owners in organized townships and cities, the credit is calculated as follows. A fraction, determined by dividing the length of high voltage line over the parcel by the total length of that particular line running over all property within the city or township, is multiplied by 10% of the tax revenue generated by that portion of the line within the city or township. The calculated amount is then deducted from the tax before credits which is the sum of the market value based tax and the net tax capacity based tax.

The credit is limited to 20% of the tax before credits. However, if the property containing the high voltage line right-of-way is included in a parcel which is more than 40 acres, the total tax before credits is multiplied by a fraction (the numerator of which is the sum of the number of acres in each quarter-quarter section or portion

thereof containing the right-of-way, the denominator of which is the total number of acres in the parcel as listed on the tax statement) before the 20% is figured. If the credit is calculated to be less than \$10, it is not given.

Power line credit amounts are distributed by the county auditor to the local taxing districts in which the properties receiving the credit are located. (See Table 45, page 269.)

### **Agricultural Preserves Credit (M.S. 473H.10)**

---

The agricultural preserves credit was established by the 1980 Legislature as part of the Metropolitan Agricultural Preserves Act. The credit was created as a means of encouraging and keeping farming within the seven-county metropolitan area. The credit first became effective for taxes payable in 1983.

Beginning with taxes payable in 1993, the Metropolitan Agricultural Preserves program guarantees that all agricultural property enrolled in this program will receive a credit of at least \$1.50 per acre of land. The county auditor computes the credit based on the land and non-residential buildings (used for agricultural purposes) which are located in a designated agricultural preserve according to two methods.

The first method calculates the credit based on the difference between the prevailing total local tax rate and 105% of the previous year's statewide average total tax rate within townships. The difference between the two rates is the agricultural preserves credit rate. The 2000 statewide average township local tax rate was 116%. This rate is then multiplied by 105%, resulting in a base rate for payable 2001 of 122%. The difference between the total local tax rate and 122% is applied to the net tax capacity of land and non-residential buildings within the agricultural preserve to determine the 2001 credit amount according to method one. If the total local tax rate is less than 105% of the previous year's statewide average tax rate for townships, there is no credit amount under method one.

The second method calculates the credit by taking the total number of acres enrolled in the agricultural preserves program times \$1.50.

The actual agricultural preserves credit amount is the greater of either method one or method two as determined above. The market value based tax provisions do not affect the credit calculation procedure for agricultural preserves credit. This credit is given only to lands designated as agricultural preserves according to M.S. 473H.03. The credit amount is deducted from the total tax before credits (the sum of the referendum market value based tax and the net tax capacity based tax) on the property tax statement for that parcel. The credit is funded by the county conservation account. If the credit exceeds the available funds, the state then makes payment of the difference from the Minnesota conservation fund. If the credit exceeds that account, payment is made from the state general fund. (See Table 46, page 271).

### **County Conservation Credit (M.S. 273.119)**

---

The County Conservation Credit was established by the 1986 Legislature as a means of promoting agricultural land use in non-metro counties. Land located in an exclusive agricultural zone created under Chapter 40A is eligible for a property tax credit of \$1.50 per acre.

The county auditor certifies to the Department of Revenue the amount of tax lost to the local taxing districts because of the property tax credit. This amount is deducted from the total tax before credits (the sum of the referendum market value based tax and the net tax capacity based tax) on the property tax statement for the parcel. The credit is funded by the county conservation account. If the credit exceeds the available funds, the state then makes payment of the difference from the Minnesota conservation fund. (See Table 46, page 271).

### **Enterprise Zone Credit (M.S. 469.170)**

---

The enterprise zone law was passed by the 1982 Legislature and became effective July 1, 1983. The purpose of an enterprise zone is to generate jobs and industry in economic hardship areas and to keep existing businesses from moving out of the state by means of several types of tax reductions and credits.

When a city or an area has qualified and been given approval for designation as an enterprise zone, it may qualify for various forms of income, sales and property tax reductions. The enterprise zone property tax credit is a state paid credit for a portion of the property taxes paid by certain commercial or industrial properties located within the enterprise zone. The amount of the credit is deducted from the total tax before credits (the sum of the referendum market value based tax and the net tax capacity based tax) on the property tax statement for that parcel. The state makes payment of the credit directly to the local taxing districts.

For taxes payable in 2001, only one county (Wilkin) in Minnesota reported enterprise zone property tax credits. (See Table 48, page 272.)

### **Disparity Reduction Credit (M.S. 273.1398, subdivision 4)**

---

Effective with taxes payable in 1989, class 4a apartments with four or more units, and commercial, industrial and public utility land and buildings in certain border city enterprise zones receive a disparity reduction property tax credit. The credit is the difference between the tax determined using the general tax procedures (including any tax based upon referendum market value) and the tax determined by multiplying the property's market value by the following percentages:

Apartment	2.3%
Commercial, Industrial, Public Utility Land and Bldgs	2.3%

The county auditor certifies the amount of the disparity reduction credit to the Department of Revenue. The state makes payment of the credit directly to the local taxing districts. (See Table 47, page 272.)

#### **Education Homestead Credit (M.S. 273.1382, subdivision 1a)**

---

The education homestead credit was established in 1997. For taxes payable 2001, each agricultural and non-agricultural homestead property is entitled to a credit equal to 83% of the property's state determined preliminary general education tax, subject to a maximum credit of \$390 per homestead.

A homeowner does not have to file an application to receive the education homestead credit. It is calculated by the county auditor and is shown as a deduction from the state determined general education tax on the homeowner's property tax statement.

The state pays these credit amounts directly to the school districts. See Table 50 on page 274.

#### **Education Agricultural Credit (M.S. 273.1382, subdivision 1b)**

---

The Legislature established the education agricultural credit for property that is classified as agricultural homestead or non-homestead as well as for timberland, starting in payable year 2000. For agricultural homestead property up to \$600,000 in market value, the 2001 education agricultural credit equals 70% of the property's net tax capacity multiplied by the education credit tax rate. The net tax capacity value of the house, garage and first acre of the property is excluded, as it receives the education homestead credit. For agricultural homestead property over \$600,000 in value, agricultural non-homestead or timberland, the credit equals 63% of the property's net tax capacity multiplied by the education credit tax rate.

Like the education homestead credit, a property owner does not have to file an application to receive the education agricultural credit as the county auditor calculates it and it appears on the property tax statement. See Table 51 on page 279.

#### **Taconite Credits (M.S. 273.135 and 273.136)**

---

The taconite homestead credit was created by the 1970 Legislature. This credit benefits homeowners on the "Iron Range" of Minnesota, where taconite production companies pay a production tax in lieu of certain property taxes.

For 2001, homeowners in taconite tax relief areas receive a credit of either 57% or 66% depending on certain criteria such as the value of the iron ore in the assessment district, proximity to mines, etc. The maximum amount of this credit is

\$289.80 for those receiving the 57% credit and \$315.10 for those receiving the 66% credit. The taconite homestead credit is calculated and deducted from the total tax before credits (the sum of the referendum market value based tax and the net tax capacity based tax) on the property tax statement for that parcel. (See Table 17, page 64.) It is paid by St. Louis County from the taconite property tax relief fund to each county receiving the credit. The county then distributes the money to each affected local taxing district. The taconite homestead credit is also given to eligible homesteaded manufactured home properties.

The supplementary taconite homestead credit was created by the 1980 Legislature. This credit is given to homeowners in school districts #317 (Itasca County) and #698 (Aitkin and St. Louis counties). It is calculated in the same manner as the 57% taconite homestead credit. Payment of this credit is made by the state out of the general fund. The supplementary taconite tax relief credit is also given to eligible homesteaded manufactured home properties. (See Table 49, page 273.)

## **Net Tax**

---

The net tax on a parcel of property is derived by deducting all appropriate property tax credits from the sum of the referendum market value based tax and the net tax capacity based tax, or the total tax before credits. The net tax amount is the final amount of tax to be paid by the property owner, except in cases where there are special assessments added to the net tax or there is an economic development tax abatement.

## **Special Assessments**

---

Special assessments involve the funding of projects such as streets, curbs, sidewalks, ditches, and storm sewers. When such improvements are made, the property owner is said to have benefited directly from the improvement. The amount of the special assessment owed is based on how much the individual property benefits from the improvement. It is not based on the value of the owner's property. Thus, special assessments are not an ad valorem tax and are not included in the calculations used to determine tax rates. They are added to the parcel's net property tax and are shown as a separate item on the tax statement.

## **Economic Development Tax Abatements**

---

There are two types of economic development tax abatements. The first one was established by the 1996 Legislature to authorize county boards to grant economic development tax abatements to commercial or industrial property at the request of the taxpayer for property that had certain improvements made to it first effective for the 1997 or subsequent assessment years (M.S. 375.194). Eligible counties include those that have an average government tax rate (net tax capacity based levy divided by taxable net tax

capacity value) at least 45 points higher than the rate of a neighboring county in the initial year in which a tax abatement is granted. None of the seven metropolitan counties are considered eligible for this abatement. Eligible property must be within 20 miles of a neighboring county that has the lower tax rate and is commercial or industrial property that has had a substantial increase (at least \$400,000 for commercial and \$100,000 for industrial) in market value due to new improvements. The county board and the taxpayer of the property enter into a written agreement specifying the percentage of the abatement over a time period that is not to exceed 10 years. The abatements are a reduction in the county portion of the tax unless the property is located within a TIF district. In that case, the TIF district would “pay” the tax abatement instead of the county.

The 1997 Legislature passed a second, broader type of economic development tax abatement that allows any political subdivision (a county, city, town or school district) to grant an abatement to any type of property, if it is found to be in the public interest to do so (M.S. 469.1812 to 469.1815). The governing body of the political subdivision adopts a resolution to grant an abatement after holding a public hearing on the proposed abatement. These abatements may be made in 1998 and subsequent years. Like the first type of abatement, the duration may not exceed 10 years. Unlike the first type, the property cannot be located in a TIF district at the time the abatement occurs, it does not exclude the metropolitan counties, and it does not require the consent of the property owner. This abatement may be in the form of the following, but not a combination of:

- 1) a rebate of property taxes to the property owner;
- 2) a reallocation of taxes to pay bondholders;
- 3) a reallocation of taxes to pay for public infrastructure costs; or
- 4) a deferment of property taxes.

The political subdivision granting the abatement does not lose any money since all the property owners within the political subdivision, including the owner of property receiving an abatement, are paying for the abatement through an increase in property tax levy equal to the amount of the abatement.

## **Collection of Taxes**

The county auditor delivers a list of all property owners, and the amount of property tax each must pay, to the county treasurer. The county treasurer is responsible for collecting delinquent real property taxes, penalties, interest, and costs.

### **Treasurers**

---

It is the duty of the county treasurer to collect all current real and personal property taxes as determined by the county auditor, as well as special assessments and penalties. The county treasurer is also responsible for collecting delinquent personal property taxes,

interest, and costs. The treasurer prepares tax statements using the information provided by the auditor and must mail the tax statements by March 31 of each year.

A late mailing of the tax statements may affect the May 15 taxes due date. If tax statements are mailed after March 31, the effective due date becomes the later of May 15 or 20 calendar days after the postmark date on the envelope containing the property tax statement.

## **Tax Payments**

---

Real estate property taxes over \$50 may be paid to the county treasurer in two equal installments. In general, half of the total tax is due on or before May 15 and the remaining half is due on or before October 15. First half taxes on certain seasonal properties are due on or before May 31. Second half taxes on certain agricultural properties are due on or before November 15. If real estate taxes are \$50 or less, the entire amount must be paid by May 15. Personal property taxes for property on leased government land may be paid in two installments like real estate taxes: the first half on or before May 15, and the second half on or before October 15. All other personal property taxes must be paid in full by May 15.

## **Tax Penalties**

---

### **Personal Property**

---

The amount of personal property tax due and remaining unpaid becomes delinquent on the day following the taxes due date (May 16 for most personal property taxes). There is an eight percent penalty added to the unpaid tax at the point it becomes delinquent. An exception to this penalty is made for personal property taxes for property on leased government land, which are subject to the penalty schedule that applies to real property.

### **Real Property**

---

On May 16, a two percent penalty is charged on unpaid homestead property and non-commercial seasonal recreational residential (cabin) property taxes and a four percent penalty is charged on unpaid non-homestead property taxes. On June 1, an additional two percent penalty is charged on unpaid homestead and cabin property taxes and an additional four percent penalty is charged on unpaid non-homestead property taxes. Thereafter, on the first day of each month, up to and including the following October 1, an additional one percent penalty for each month is charged on the unpaid tax. If the second half tax is not paid prior to October 16, homestead and cabin properties are charged a two percent penalty on the unpaid second half taxes due and non-homestead properties are charged a four percent penalty.

For homestead and cabin property, an additional penalty of four percent is added November 1 and an additional penalty of two percent is added December 1 if the second half taxes remain unpaid. For non-homestead property, an additional

penalty of four percent is added November 1 and an additional penalty of four percent is also added December 1 if the second half taxes remain unpaid. On the first business day in January of the following year, the unpaid real estate taxes for the prior year are deemed to be delinquent, and an additional penalty of two percent is added on to both the unpaid first half taxes and the unpaid second half taxes. Interest on the unpaid taxes also begins to accrue from January 1 of the following year.

## **Manufactured Homes**

Mobile homes, by statute, are called manufactured homes. A "manufactured home" is defined as a structure that is transportable in one or more sections, built on a permanent chassis and designed to be used as a dwelling, with or without a permanent foundation.

If a manufactured home meets the following criteria, it is classified, assessed and taxed as if it were real estate property:

1. The owner of the home holds title to the land on which the home is situated;
2. The home is attached to the land by a permanent foundation, or is installed at its location in accordance with the manufactured homes building code (M.S. 327.31 to 327.34), or is affixed to the land in a manner comparable to other real estate property in the taxing district; and
3. The home is connected to public utilities, has a well and septic tank system, or is serviced by water and sewer facilities comparable to other real property in the taxing district.

If the owner of the manufactured home leases the land on which it is situated and if the manufactured home meets criteria 2 and 3 above, the home is classified as personal property, but is assessed and taxed as real property. Personal property manufactured homes are assessed and taxes are payable in the same year.

For the 1999 assessment, taxes payable in 2000 (see Tables 58 and 59, pages 295 and 298), manufactured homes not classified as real property were assessed using the real property class rates for assessment year 1999. These rates can be found on Table 12.

The value of personal property manufactured homes is not used in the determination of tax rates for real and other personal property for that year, but personal property manufactured homes are taxed at the tax rates used for real and other personal property for taxes payable in the same year.

Manufactured homes not treated as real property may also qualify for certain property tax credits, including the taconite credit, education homestead credit, and disaster credit. (See Property Tax Credits, page 20.)

The county treasurer must send out tax statements to the owners of manufactured home personal property by July 15 each year. Manufactured home personal property taxes over \$50 may be paid to the county treasurer in two equal installments: the first half on or before August 31, and the second half on or before November 15. If the tax is \$50 or less, the total tax is due August 31. Any tax or installment remaining unpaid after the due date is delinquent and an eight percent penalty is added to the unpaid tax.

- (1) Beginning with taxes payable in 1973, assessed values and tax rates were based on full market value instead of adjusted market value which had applied in prior years. With this change, assessed values and average tax rates changed considerably.
- (2) The statewide average tax rate is exclusive of special assessments. Tax rates for years 1925-1988 are expressed in mills. Tax rates for 1989-2001 are expressed as percentages.
- (3) Beginning with taxes payable in 1993, certain levies and rates are calculated based on taxable market values.
- (4) For payable year 1989, gross tax capacity value replaced assessed value.
- (5) For payable year 1990, net tax capacity value replaced gross tax capacity value.

NOTE: Footnotes may be found on page 38.

## FOOTNOTES FOR TABLES 2, 3 and 4

1) Due to the elimination of the "adjusted market value" concept, the mill rate decreased to approximately one-third of the previous level. Average tax capacity rate replaced mill rate in payable year 1989. See explanation on page 3.

2) Total amounts of homestead credit include the following amounts of taconite credit:

1970 .....	\$1,012,094	1975 .....	\$ 3,648,072	1980 .....	\$13,006,426	1985 .....	\$10,460,191
1971 .....	1,043,486	1976 .....	9,263,039	1981 .....	14,398,085	1986 .....	10,777,180
1972 .....	2,814,419	1977 .....	9,066,923	1982 .....	16,412,340	1987 .....	11,203,839
1973 .....	2,617,416	1978 .....	9,524,963	1983 .....	17,854,916	1988 .....	11,125,532
1974 .....	3,250,178	1979 .....	11,748,570	1984 .....	19,416,876	1989 .....	8,316,100

Amounts for 1990 through 1997 are only values for Taconite Homestead Credit. Homestead and Agricultural Credit Aid (HACA) replaced homestead and agricultural credit for taxes payable in 1990. See explanation of HACA on page 15.

Total amounts of homestead credit for 1998 and beyond include the following amounts of education homestead credit:

1998 .....	\$160,270,572	1999 .....	\$304,251,980	2000 .....	\$394,435,369
2001 .....	\$403,248,164				

3) Includes the Seven County Metropolitan and Iron Range Contribution Levy, in dollars:

1975 .....	16,672,517	1982 .....	65,019,879	1989 .....	248,777,251	1996 .....	367,121,354
1976 .....	20,896,439	1983 .....	88,756,546	1990 .....	277,109,399	1997 .....	383,391,232
1977 .....	19,418,464	1984 .....	107,423,873	1991 .....	304,944,335	1998 .....	410,328,625
1978 .....	23,075,548	1985 .....	137,398,665	1992 .....	339,982,742	1999 .....	398,115,767
1979 .....	29,523,199	1986 .....	141,184,290	1993 .....	356,995,253	2000 .....	408,269,462
1980 .....	36,368,483	1987 .....	169,633,883	1994 .....	369,069,172	2001 .....	435,446,442
1981 .....	46,774,964	1988 .....	208,371,672	1995 .....	325,286,388		

Also includes Power Line Levy, in dollars:

1982 .....	367,851	1987 .....	429,381	1992 .....	467,315	1997 .....	467,848
1983 .....	407,699	1988 .....	444,736	1993 .....	488,633	1998 .....	416,284
1984 .....	395,464	1989 .....	448,243	1994 .....	491,628	1999 .....	381,288
1985 .....	404,262	1990 .....	453,457	1995 .....	496,570	2000 .....	367,817
1986 .....	420,745	1991 .....	466,141	1996 .....	478,375	2001 .....	332,512

4) Includes Tax Increment Financing Levy, in dollars:

1982 .....	35,141,373	1987 .....	117,465,743	1992 .....	255,788,716	1997 .....	299,942,270
1983 .....	46,425,859	1988 .....	154,372,728	1993 .....	278,915,518	1998 .....	299,099,241
1984 .....	58,154,901	1989 .....	183,983,207	1994 .....	268,517,539	1999 .....	301,890,301
1985 .....	70,761,120	1990 .....	192,295,363	1995 .....	276,845,444	2000 .....	314,420,873
1986 .....	92,355,076	1991 .....	230,125,125	1996 .....	286,308,639	2001 .....	341,614,575

5) Starting in 1981, the net taxes column reflects the exclusion of the following credits:

	<u>1981</u>	<u>1982</u>	<u>1983</u>

(1) Special Assessments are not included in the taxing district levy when tax rates are determined.

(2) School Districts do not have special assessments. However, the entries in this table are basically old school district debts that were treated as special assessments during that year in which the taxes were due.

(3) Prior to payable year 1974, no specific provisions were made for reporting special taxing districts' (specifically watersheds) special assessments. Hence, any special taxing district's special assessments were shown on this table as county special assessments. Effective with payable 1974, a separate column was provided for reporting special taxing districts' special assessments.

(1) For payable year 1989, gross tax capacity value replaced assessed value. For payable year 1990, net tax capacity value replaced gross tax capacity value.

(2) Fiscal Disparities was first implemented for taxes payable in 1975. The Iron Range began their program in 1998.

(3) Power Line Credit became effective for taxes payable in 1982.

1998	11,614,721	56,414	57.0 or 66.0%	\$289.80 or \$315.10
1999	15,251,912	56,819	57.0 or 66.0%	\$289.80 or \$315.10
2000	15,586,802	57,816	57.0 or 66.0%	\$289.80 or \$315.10
2001	15,820,359	57,605	57.0 or 66.0%	\$289.80 or \$315.10

(1) The Taconite Credit Amount, starting in 1981, includes the following Supplementary Homestead Credit Amount:

1981...\$419,537	1986...\$336,928	1991...\$342,031	1996.. \$466,747	2001...\$564,095
1982... 465,160	1987... 344,826	1992... 339,307	1997... 467,639	
1983... 504,017	1988... 347,560	1993... 380,291	1998... 483,127	
1984... 588,618	1989... 328,575	1994... 415,872	1999... 512,057	
1985.. 311,485	1990... 310,054	1995... 454,808	2000... 537,757	

(2) The 1977 and 1978 percentages and maximums were adjusted due to insufficient receipts to cover the credit. The figures before adjustments were:

1977 - 52% or 60% with maximums of \$300 or \$350;  
1978 - 57% or 66% with maximums of \$300 or \$385.

(3) Taconite homestead credit maximums were significantly reduced by statute in payable year 1990.

(1) Effective with taxes payable in 1989, the wetlands and native prairie credits and reimbursements were eliminated.

(2) Tax Capacity replaced assessed value in payable 1989 and subsequent years.

(3) Effective with taxes payable in 1993, the program guarantees that all enrolled property will receive a credit of at least \$1.50 per acre of land.

(1) Adjustment amounts for homestead credit may include adjustment amounts for one or more of the following: reduced assessment credit (1982-1985), wetlands and native prairie credits and reimbursements (1982-1990), agricultural preserves credit (1984-2000), disaster and enterprise zone credits (1985-2000), small business credit (1989-1990), agricultural credit (1990-1992), disparity reduction credit (1990-2000), county conservation credit (1990-2000), rental equity credit (1995-1996), education homestead credit and education agricultural credit (1998-2000).

(2) Prior year homestead credit adjustment amounts for tax increment financing districts were first reported separately in 1981.

(3) Prior to payable year 1977, agricultural aid was based on a state financed mill rate differential as opposed to the agricultural credit referenced in this table.

(1) Values prior to 1989 are assessed values. Values for 1989 are gross tax capacity values. Values for 1990 are net tax capacity values.

(2) Metropolitan area-wide tax rates prior to 1989 are expressed in mills. The 1989 and subsequent year area-wide tax rates are expressed as percentages.

(1) Values prior to 1989 are assessed values. Values for 1989 are gross tax capacity values. Values for 1990 are net tax capacity values.

(2) Metropolitan area-wide tax rates prior to 1989 are expressed in mills. The 1989 and subsequent year area-wide tax rates are expressed as percentages.

(1) Prior to 1981, manufactured homes only had two categories, one for residential homesteads and one for non-homesteads. There was no farm designation.

(2) Farm 1981-1989: % up to base value - % over base value  
1990-1992: % on first tier - % on second tier - % on third tier  
1993-1998: % up to base value - % over base value

Residential 1973-1980: % up to base value - % over base value  
1981-1985: % on first tier - % on second tier - % on third tier  
1986-1988: % up to base value - % over base value  
1989-1992: % on first tier - % on second tier - % on third tier  
1993-1998: % up to base value - % over base value

(3) For payable year 1989, gross tax capacity values replaced assessed values.

(4) For payable year 1990, net tax capacity values replaced gross tax capacity values.

2000	229,479	-	10,281,213	-	1,881,846	91,048	-	-	8,308,319

(1) In payable year 1989 gross tax capacity values replaced assessed values.

(2) In payable year 1990 net tax capacity values replaced gross tax capacity values.

(3) In payable year 1990, homestead credit and agricultural credit were replaced by Homestead and Agricultural Credit Aid (HACA). See explanation of HACA on page 15.

(4) Education homestead credit was added effective payable year 1998.

(5) Taconite homestead credit may also include disaster credit for certain years.

(1) School District Levy includes net tax levy and school district market value based levy.

(2) The total levy for the metropolitan and taconite counties includes the fiscal disparity contribution levy. Fiscal disparity contribution levies can be found in Table 53. The special taxing district levy and the total levy amounts include tax increment financing (TIF) levies for those counties containing a TIF district. TIF values and levies can be found in Table 27.

The total levy amount also includes any power line levy amounts. Power line levy amounts can be found in Table 55.

# Explanation of Categorical Division of County, City/Township, School District, and Special Taxing District Levies by Major Purpose

To obtain uniform reporting from the 87 counties, the numerous authorized levies are grouped by major purpose of the levy. The county auditors are provided with instructions which detail the individual levies to be included in each category on the abstract. Some are self-explanatory, while others include a wide variety of levies.

The following list is not a complete digest of all the levies. It is merely a general index to the nature of each category as found on the abstract. Tables 34 through 38 are patterned after the design of the abstract headings.

## **COUNTY LEVIES**

<b><u>Column Heading</u></b>	<b><u>Items Included Within Column Heading</u></b>
General .....	General revenue, county or regional jail construction, other county buildings, public employees' retirement and social security funds, employees on leave from the state, ambulance service, health department and county controlled hospital districts, mental health services, nursing homes, cattle testing, agricultural societies and extension committees, civil defense, correction centers, probation services, sheltered workshops, senior citizen recreation programs, historical societies, insect and weed control, solid waste programs, parks and monuments, and voting machines.
Indebtedness .....	General obligation, state loans, and debt portion of other levies.
Road and Bridge .....	Road and bridge repair and maintenance.
Social Service, Public & General Assistance.	Social services and income maintenance programs, general assistance, aid to dependent children, aid to blind and disabled persons, medical assistance, purchase and delivery of social services.
Public and General Assistance .....	Administrative expenses for public and general assistance portions.
County and/or Regional Library .....	County library and contracts for library service.

Miscellaneous .....	Unpaid county assessments, state reassessment costs, judgments, armories and special purposes.
County Special Assessments.....	Property taxes categorized as special assessments are not determined through the use of a tax rate as are ad valorem property tax levies. Instead, the dollar amount of a special assessment is paid by the property owner who benefits from the improvement regardless of the cash value of the owner's property. Examples of special assessments are ditches, curbs, gutters and storm sewers. If public property is improved by a special assessment, however, such as a courthouse sidewalk, every property owner pays a portion of its costs. The improvement is financed through proper funds within the county or municipality's total ad valorem levy.

## **CITY/TOWNSHIP LEVIES**

<b><u>Column Heading</u></b>	<b><u>Items Included Within Column Heading</u></b>
General Revenue - Tort .....	Tort liability insurance.
General Revenue - Other.....	Regular and general fund purposes, relief for paid and volunteer firemen, police security funds, airports, ambulance and health services, civil defense, aquatic vegetation, water pollution, insect control, fire and police protection, community correction and activity centers, dump grounds and sewage disposal, commemorative purposes, parks, recreation, musical entertainment, library, cemetery, voting machines, and tort liability insurance.
Indebtedness .....	General obligations, state loans, hospitals, parking facilities, water, sewer bonds, indebtedness of dissolved villages, and all other debt within any fund.
Road and Bridge .....	Road work, road drainage, and bridge repairs.
Miscellaneous .....	Advertising, comprehensive planning, judgments, state post-audit expense, permanent improvement and replacement fund.
City/Township Special Assessments .....	See above explanation for County Special Assessments.

## **SCHOOL DISTRICT LEVIES**

Each of the following categories relate directly to the type of school property tax levy reported on the form entitled "Levy Limitation and Certification - 2001 Payable 2002".

<b><u>Column Heading</u></b>	<b><u>Items Included Within Column Heading</u></b>
General (Voter approved, state determined and other general levies reported separately) .....	Administration, operation and maintenance of school programs and buildings, includes salaries, fuel, supplies, and transportation costs, including bus service.
Community Service .....	Community oriented activities, not limited to any age group.
General/Indebtedness (Voter approved and other debt levies reported separately) .....	Debt service payments on general obligation bonds and state loans. Most debt is incurred due to a building program.

## **SPECIAL TAXING DISTRICT LEVIES**

Although special taxing districts exist with great variance among the counties, general categories are established in this section of the abstract. If special taxing districts exist in a county, the levies are entered separately for all revenue, including tort liability, and debt. There are 16 main categories of special taxing districts as described in the 2000 Tax Levy Authorizations and Limitations manual as prepared and published by the Department of Revenue.

1. General Provisions
2. Economic Development Authorities
3. Hospital Districts
4. Housing and Redevelopment Authority
5. Metropolitan Airport Commission
6. Metropolitan Council
7. Metropolitan Mosquito Control Commission
8. Park Districts
9. Port Authorities
10. Regional Development Commissions
11. Regional Public Library
12. Regional Railroad Authorities
13. Regional Sanitary Sewer Districts
14. Sanitary Districts
15. Watershed Districts
16. Miscellaneous Districts

\* Total Non-Agricultural net tax includes any values reported for that Class 5 property not able to be classified in any other category:

Aitkin	2,850
Big Stone	10,537
Carver	235
Chisago	22,340
Pipestone	18,654
Pope	55
Rice	81
Sibley	1,265
Total	<u>56,017</u>

# ESTIMATED DISTRIBUTION OF THE NET TAX PAYABLE IN 2001 BY USE CLASS STATEWIDE

Total = \$5,035,683,044

## Real Property

■ Agricultural \$420,364,304
 ■ Non-Agricultural \$4,453,916,572

## Personal Property

Personal Property \$161,402,168

**Figure 5**

\* Total Non-Agricultural net tax includes any values reported for that Class 5 property not able to be classified in any other category.

(1) Counties not listed in this table did not have any power line credit for taxes payable in 2001.

(2) All transmission lines in this county are located in unorganized townships and taxed at the average county tax rate. Therefore, the tax capacity value and levy for these lines is shown on table 55. Beginning with taxes payable in 1983, 10% of the tax on power lines of 200KV or larger in these unorganized townships is to go toward the funding of the power line credit.

(1) These columns exclude mineral values of \$175,336 for Net Tax Payable, \$122,808 for Net Tax Capacity Value, and \$3,611,999 for Taxable Market Value.

(2) Nominal Tax Rate is Net Tax Payable divided by Net Tax Capacity Value.

(3) Indicated Market Value is the assessors' market value adjusted for the level of assessment as indicated by the assessment sales ratio study.

(4) Effective Tax Rate is the Net Tax Payable divided by the Indicated Market Value.
